

Protecting your product, enhancing your brand.

TAMPER EVIDENCE AND ANTI-COUNTERFEITING SOLUTIONS

As a major supplier to global distilleries, Viscose Closures Limited supply a wide range of caps and closures as well as offering tamper evidence and counterfeiting solutions to enable you to protect your product safety and enhance your brand integrity. We support small artisan customers through to major brands and specialise in solutions for spirits including Rum, Whisky, Tequila, Mescal and Gin.

A sample of our product range is listed and we encourage you to call our dedicated sales team who offer practical packaging closures solutions to your products as well as technical advice.

We also manufacture...

Tamper evident bands that cover corks & stoppers in a variety of materials to suit your needs.

Viscose is proud to offer environmentally friendly options including bio degradable and compostable solutions.

PREFORMS

Preforms are cut bands which have been formed into a shape by shrinking them on to a mould and are easily applied to all spirit bottles. Preforms are easy to apply by hand or with machinery and achieve a superior finish by applying heat to shrink them neatly either by using a heat tunnel or gun.

It is common to pre-distort the print design in order that it assumes the correct proportions after shrinking and we can pre-distort artwork supplied or offer suggestions based on your brand. Single or multiple lines of perforations can be introduced either vertically or horizontally to make sleeves easier to remove.

Coloured, printed, holographic tear strips can be affixed to preforms in a vertical orientation and can be used in combination with perforations to provide an effective easy-open feature to the pack. Plain colours, metallic colours and holographic designs are available.

Visit our full range of options by visiting the Products page www.viscoseclosures.com
